

class	10,20	20,30	30,40	40,50	50,60	60,70
n_i	4	7	11	18	9	1
x_i	15	25	35	45	55	65
ICF	4	11	22	40	49	50

$$x_i = \frac{L + U}{2}, \quad N = \sum n_i = 50$$

$$\text{mean} = \frac{\sum n_i x_i}{N} = \frac{1990}{50} = \underline{39.8}$$

$$\text{Median} = L + \left(\frac{\frac{N}{2} - ICF_{i-1}}{n_i} \right) h \quad \frac{50}{2} = 25 \Rightarrow \text{class: } [40, 50[$$

$$\text{Median} = 40 + \left(\frac{25 - 22}{18} \right) 10 = \underline{41.66}$$

$$\text{Mode} = L + \left(\frac{n_4 - n_3}{(n_4 - n_3) + (n_4 - n_5)} \right) h$$

$$\text{Mode} = 40 + \left(\frac{18 - 12}{18 - 12 + 18 - 9} \right) 10$$

$$\text{Mode} = \underline{44.375}$$

Day 5 ☺
